

Access your computers via RemotePC

RemotePC allows users to access and manage remote computers from anywhere, given that the computer being accessed has an active Internet connection and RemotePC application installed on it.

By using RemotePC, users can invite their associates to collaborate, transfer files, print documents remotely and more.

Features for your remote access needs

Always-ON Remote Access

Configure your computer for remote access so that you can take control of the computer over the internet.

One-Time Instant Access

Allows your associates to access your computer one time by sharing a unique access ID and Key.

Platform Independent

Access your remote computer from a PC/Mac, even from iPhone/iPad or Android devices.

Contd...

Security

Secure remote access with TLS v 1.2 / AES-256 encryption. Personal Key (not applicable for enterprise accounts) acts as a secondary password.

Scalable

Add computers to your plan, based on your needs, without additional hardware or software requirements.

File Transfer

Transfer files and folders, even from mapped drives, between your computers.

Chat

Chat with your partner sitting at the remote end by sending/receiving messages.

Remote Printing

Print documents and images that are on your remote computers from anywhere.

More...

- > Invite an associate to temporarily access your computer to work.
- > Record and save all your remote sessions at any desired location on your local computer.
- > Track your activities with remote access logs and web activity logs.
- > Drag and drop files from a remote computer to your computer or vice versa.

Get started with RemotePC and stay connected with your remote computers

- ✦ Sign up for RemotePC account online at www.remotepc.com
- ✦ Download, install and run RemotePC application on your computers.
- ✦ Stay connected with your remote computers and work collaboratively with your partners by providing them instant access.
